DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-11, 13-15, 17-25, and 27-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen (6,744,740).

As per claims 1, 21, 31, and 36, Chen discloses a method of routing a message from a source node to a destination node in an adhoc wireless network, wherein transmitting a first message from the source node to the destination node, receiving said first message at said destination node, transmitting a second message from said destination node in response to the first message and, wherein at least one of said first message and said second message is sent between the source and destination nodes via a plurality of paths comprising at least one intermediate node, selecting a path for communication between the source node and the destination node using an indication of the time taken for at least one of said second and first messages to propagate between each node on each path (fig. 12A-12D, col. 9/ln. 44-col. 11/ln. 2).

As per claims 2-3, 22, and 32, Chen discloses the claimed limitation (TABLE2, col. 8/ln. 33-45, col. 9/ln. 44-col. 11/ln. 2).

As per claims 4-6, 23, and 33-34, Chen discloses the claimed limitation (TABLE2, col. 8/ln. 33-45, col. 9/ln. 44-col. 11/ln. 2).

As per claim 7, Chen discloses the claimed limitation (TABLE2, col. 3/ln. 61-65, col. 8/ln. 33-45, col. 9/ln. 44-col. 11/ln. 2).

As per claims 8-9 and 24, Chen discloses the claimed limitation (col. 4/ln. 40-52, col. 5/ln. 1, col. 5/ln. 46, col. 14/ln. 20-21, col. 14/ln. 34-35).

As per claims 10-11, 25, and 25, Chen discloses the claimed limitation (col. 4/ln. 40-52, col. 4/ln. 65, col. 5/ln. 5-16).

As per claims 13 and 27, Chen discloses the claimed limitation (col. 4/ln. 40-52, col. 7/ln. 21-31).

As per claims 14 and 28, Chen discloses the claimed limitation (col. 4/ln. 40-52, col. 7/ln. 21-31, col. 14/ln. 20-21, col. 14/ln. 34-35).

As per claims 15 and 29, Chen discloses the claimed limitation (col. 4/ln. 40-52, col. 7/ln. 21-31, col. 14/ln. 20-21, col. 14/ln. 34-35, col. 14/ln. 28-31).

As per claim 17, Chen discloses the claimed limitation (col. 4/ln. 40-52, col. 7/ln. 21-31, col. 14/ln. 20-21, col. 14/ln. 34-35, col. 14/ln. 28-31, where it is clear that the system selected the shortest route that provide the best connectivity).

As per claim 19, Chen discloses the claimed limitation (col. 1/ln. 41).

As per claim 20, Chen discloses the claimed limitation (fig. 1, col. 3/ln. 45-65).

As per claim 30, Chen discloses the claimed limitation (col. 4/ln. 40-52, col. 7/ln. 21-31, col. 14/ln. 20-21, col. 14/ln. 34-35, col. 14/ln. 28-31).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12, 16, 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (6,744,740) in view of Chuprun et al. (6,115,580).

As per claims 12, 16, 26, Chen suggested such method of optimal path based upon various criteria but not explicitly based upon velocity. However, Chuprun et al. taught such method (col. 11/ln. 38-42). Therefore, it would have been obvious to one of ordinary skill at the time of invention for the Chen to utilize such method, as taught by Chuprun et al., in order to enhance connectivity in a wireless communications network by intelligently selecting the wireless links that provides the optimal connections between nodes in the network.
